

GeDiPNet Cluster 425 -- Top Shared Genes

Curated genes (disease\_gdp) linked to 2 or more of this cluster's member diseases, most widely shared first. Data as of: 2026-10-08 03:15:01. · Rows: 3 · Generated: 2026-10-08 03:33:35

| Gene    | Member Diseases Linked | Cluster Size | Linked Diseases                                                                                                  |
|---------|------------------------|--------------|------------------------------------------------------------------------------------------------------------------|
| LPIN1   | 3                      | 5            | Digestive system neoplasms; Genetic recurrent myoglobinuria; myoglobinuria, acute recurrent, autosomal recessive |
| DYSF    | 2                      | 5            | Digestive system neoplasms; Dysferlinopathy                                                                      |
| SLC29A3 | 2                      | 5            | Digestive system neoplasms; H syndrome                                                                           |
